Joanna Waligóra

Data Scientist / GIS Specialist
Cracow, Małopolskie, Poland

Summary

LLM Engineer / Data Scientist with hands-on experience in building applications powered by Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and AI Agents. Strong background in Python, machine learning, deep learning, and GenAI systems. Experienced in designing end-to-end LLM pipelines including document processing, embeddings, vector search, fine-tuning (LoRA/QLoRA), prompt engineering, and evaluation. Over 10 years of experience working with complex datasets (spatial and technical), now focused on scalable AI-driven systems.

Experience

Umowa zlecenie/freelancing

Data Scientist

June 2024 - Present (1 year 10 months)

- Designed and implemented AI applications in Python using open-source and API-based LLMs with end-to-end processing pipelines.
- Built LLM-powered systems for transforming natural language into structured outputs, including extraction workflows and JSON-style responses.
- Developed agentic AI workflows and multi-agent systems using LangGraph, CrewAI, AutoGen, LangChain, OpenAI Agents SDK, and MCP-related integration patterns.
- Integrated external tools, APIs, and RAG pipelines including document chunking, embeddings, vector indexing, retrieval, and answer evaluation.
- Applied machine learning techniques including classification, regression, clustering, and time series analysis, covering preprocessing, feature engineering, model training, and evaluation.
- Built interactive AI applications with Gradio and improved model performance through prompt engineering, LoRA/QLoRA fine-tuning, and iterative testing.

EnergisData Sp. z o.o.

Network Asset Inventory Specialist

September 2025 - November 2025 (3 months)

Kraków, Woj. Małopolskie, Polska

- Completing registration and technical data regarding the electricity infrastructure.
- Worked with structured databases and data quality control processes.

Tukaj Mapping Central Europe.

8 years 8 months

GIS Specialist

August 2017 - December 2021 (4 years 5 months)

Cracow, Małopolskie, Poland

- Managed and validated large spatial datasets (EGiB, GESUT, BDOT500).
- Standardized data structures and improved data quality.
- Collaborated on data modernization projects using QGIS.

Power Grid Asset Inventory Team Leader

May 2013 - August 2017 (4 years 4 months)

Cracow, Małopolskie, Poland

- Led a technical team responsible for data inventory and quality control.
- Coordinated workflows and ensured delivery of high-quality datasets.
- Trained new team members and cooperated with external stakeholders.

Umowa zlecenie/freelancing

Vectorization & Mapping Specialist (contract roles)

April 2011 - May 2013 (2 years 2 months)

- Worked on photogrammetric surveys and gas network mapping.
- Verified and improved spatial database accuracy.

Education

Uniwersytet Rolniczy im. Hugona Kołłątaja w Krakowie

Master's degree, Geodesy and Cartography · (September 2007 - June 2012)

Courses
